HTML & CSS Courses

C++ Courses **SKILLS**

HTML | CSS | JavaScript | Java | C++ | Problem Solving in programming | SQL | Web Development | GitHub | Git | UI | UX

PROJECTS

[1/08/2025 – 10/8/2025] **Leon Template – Creative Agency Landing Page**

Developed a modern and responsive creative agency website based on a professional UI design concept, focusing on clean layouts and smooth user experience.

Key Features:

- Built the complete website structure using semantic HTML5.
- Created a modern responsive layout using CSS3, Flexbox, and CSS Grid.
- Developed sections including header, landing page, services, portfolio, about, and contact.
- Applied advanced CSS techniques to achieve accurate spacing, alignment, and visual consistency.
- Implemented responsive behavior across different devices using media queries.
- Organized project files with a clean and maintainable structure.

Technologies: HTML5, CSS3, Flexbox, CSS Grid, Responsive Design, Media Queries

[15/08/2025 – 20/8/2025] **Kasper – Responsive Landing Page**

Developed a modern responsive landing page inspired by a professional design concept, focusing on clean UI structure and user-friendly layouts.

Key Features:

- Built the complete website structure using semantic HTML5.
- Created a responsive design using CSS3, Flexbox, and media queries.
- Implemented modern sections including header, hero section, services, portfolio, about, and contact sections.
- Applied advanced CSS styling techniques to achieve accurate layout and visual consistency.
- Optimized the interface for different screen sizes and devices.

Technologies: HTML5, CSS3, Responsive Design, Flexbox, Media Queries

[01/07/2026 – 31/7/2026] **ERP Frontend System – Ministry Management Platform**

Developed a complete responsive Front-End system for a government administrative platform, focusing on improving user experience and organizing complex management workflows.

Key Responsibilities & Features:

- Designed and developed a modern RTL Arabic user interface using HTML5, CSS3, and JavaScript.
- Built reusable UI components including dashboards, navigation layouts, sidebars, and interactive forms.
- Developed management interfaces for HR, finance, reports, and administrative operations.
- Implemented responsive layouts to ensure compatibility across different screen sizes.
- Organized project structure using modular CSS and JavaScript files for maintainability.
- Integrated interactive features such as data tables, filtering, forms, and UI interactions.

Technologies : HTML5, CSS3, JavaScript, Responsive Design, Git, GitHub
